EXR6004 Mini

4CH NVR

The Linux-based EXR6004 Mini supports plug and play with AVer IP cameras for uniquely hassle-free installation. It can display up to 5 megapixels for any one channel and a total of 8 megapixels for all channels. Furthermore, the advanced alarm notification mechanism alerts you whenever critical events occur, making the EXR6004 Mini the ideal NVR for retail stores and home use.

Onvif

Plug and play

Connect any AVer IP camera to the EXR6004 Mini in a few simple steps with AVer's plug and play function. Just plug in the cameras to a PoE switch or hub that connects to the EXR6004 Mini, and watch as the NVR automatically detects every camera's IP address and has them all up and running with no further configurations.

Intelligent streaming technology

With unique intelligent streaming technology for AVer's IP cameras, users can enjoy smooth preview images at both remote and local NVR sites. Excellent preview performance can be achieved by optimizing streaming capability and related settings like compression type, frame rate and quality can be freely customized.

Advanced alarm management

When video is lost, motion is detected and/or a number of other abnormal events occur, the NVR's advanced alarm mechanisms trigger specific actions to address the situation, such as recording live image, activating warning sirens, automatically uploading files to a remote server, sending alarm notifications to the central management system (CMS), sending emails, and drawing attention to the screen by launching an E-map or a specific camera view.

Compact solution for space-limited applications

With a size equal to a paperback book and a price that's just right for small to medium-sized businesses, retail stores, and home use, the EXR6004 Mini is the perfect choice for users looking to install IP security system while dealing with tight budget and limited space.

Versatile remote software integration

The EXR6004 Mini is compatible with AVer's CM3000 and CM3000 Gold Central Management Systems (CMS) to achieve powerful centralized management of up to 1000 AVer DVRs/NVRs and to create a TV-wall command center through AVer's Remote iMatrix software. It is also fully integrated with AVer's mobile monitoring software, so users can view live video stream on iPhones, iPads, Android phones and tablets.
